CUTTING

Perfect cutting results through thick and thin

GARDENA Secateurs are high quality pruning tools for fresh green wood that provide efficient cutting results. The ergonomic handles made with soft anti-slip components are gentle on the wrists.

For cutting, pruning and exact shaping

Precise trimming of hedges

GARDENA Hedge Clippers are suitable for cutting and shaping of hedges. Robust steel blades are non-stick coated preventing offcut clippings from sticking to the blades.

Lightweight with more cutting power

Easily achieve great cutting results

Innovative solutions and state-of-the-art materials ensure extra comfort and superb cutting results with the GARDENA lopper range. Whether for exact shaping or for large-scale cutting back, each product is optimised for its intended purpose and is designed for the needs of the user.

GARDENING SECATEURS

Classic Bypass

18 mm
8754-20

High quality cutting tools with excellent ergonomics that guarantee lasting, reliable cutting results.

reddot winner 2016

GARDENA Secateurs offer:

- Precision ground blades with non-stick coating.
- Adjustable handle opening to S-XL hand size.
- Fibreglass handle with soft components for user comfort.

20 mm
8854-20

22 mm
8857-20

Premium Bypass

24 mm
8904-20

25 mm
8906-20

Anvil

18 mm
8855-20

22 mm
8903-20

Ergonomically shaped handles with soft components for comfortable handling.

The adjustable handle width can be set to accommodate various hand sizes.

Increased reliability by integrated stainless steel springs that are non-detachable (on select models)

2 handle positions for power cutting and quick snipping.

Did you know

The difference between Bypass and Anvil cutting? Bypass cutting principle is when two ground blades slide past each other on cutting, providing an accurate and clean cut. Anvil cutting is for hard, dry wood and provides support when cutting thereby preventing damage to the branch.

EXPERTCUT PRO

ExpertCut Pro Secateurs
12203-20

GARDENA ExpertCut is a hardwearing, professional bypass secateurs designed to provide clean cuts with a maximum diameter of 22 mm.

High quality Stainless Steel blades
- New grinding angle provides more than **320 000 cuts**
- Long lasting blades and effortless cutting
- Self sharpening

Wire Cutting
Knotch in blade allows for cutting binding wire easily

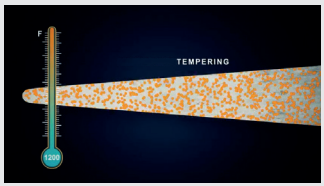
Easy to use for small and medium hands
- 2 Step Opening
- One hand lock / opening for right and left handed

Easy Cleaning
Sap drainage protects the blades from sticky plant fluids.

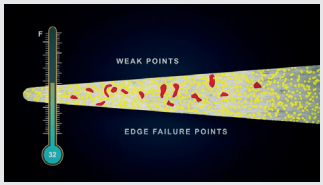
Comfortable to handle
- ErgoTec handles made from soft anti-slip components.
- Developed in conjunction with German University

For wrist protection and comfortable work.
Built in durable buffers protect hands and wrists resulting in longer working time.

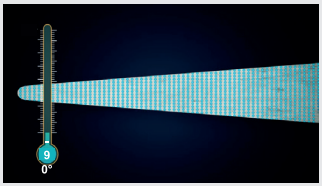
Special blade core-hardening process



Tempering / Heating
Heat steel up to 1200°



Normal hardening:
Cooling down by room Temperature in oil or air. This process hardens blade up to 54HRC.



New additional hardening:
Cooled in -90° nitrogen. Steel becomes extremely hard, up to 60HRC.

No weak points.
-> Used in the automotive industry

LOPPERS

reddot winner 2020

For effortless pruning of trees and branches

The GARDENA Loppers are designed to be robust, long lasting and lightweight which offer the best cutting results.

EnergyCut UP TO 3x POWER+ ALU ErgoTec

The handy Pruning Lopper with integrated gear is a powerful tool for cutting fresh wood.

EasyCut

ALU ErgoTec

EasyCut Pruning Lopper range consists of Anvil and Bypass cutting principles.
- Bypass: For cutting fresh wood.
- Anvil: For cutting dry hard wood.

EasyCut Loppers have excellent lever action due to its low weight, reducing effort required. Precision-ground blades with non-stick coating guarantee an accurate cut which is gentle on plants.

ErgoTec lightweight aluminium handles provide a comfortable grip. Stop buffers protect wrists and joints.

Precision-ground blades
Provide easy and precise cutting and are gentle on plants.

ErgoTec handles
Aluminium lever arms and ergonomically-shaped handles allow easy handling and safe work.

Bypass Cutting
Two ground blades slide past each other on cutting, providing an accurate and clean cut.

reddot winner 2020

TeleCut

ALU ErgoTec

The TeleCut Pruning Loppers from GARDENA become your “extended arm”.

The length adjustable lever arms provide excellent lever action which means less force is required when cutting.

The TeleCut 520-670 B can be extended by 15 centimeters. With the extra length you can easily reach branches of shrubs and trees that are a little further away. The function is easily operated via the telescopic trigger near the handle area.

The TeleCut 650-900 B can be extended up to 25 cm. You can cut with more power due to the increased leverage, which is a real help especially with thicker branches.

PremiumCut

ALU ErgoTec

Designed to cut branches up to 40 mm in diameter precisely and effortlessly. Leverage and gearing allows the lopper to increases cutting force by 18 times.

SmartCut

ALU ErgoTec

Extremely powerful and easy-to-use anvil lopper that can easily handle different cutting conditions.

ComfortCut

ALU ErgoTec

Gentle on the wrists
Stop buffers made from special plastic protect the wrists.

Anvil Cutting
Suitable for hard, dry wood and prevents damage to the bark.

Coating
The non-stick extra coating ensures smooth cutting and rust protection.

HEDGE CLIPPERS
PREMIUM

reddot winner 2020

Everything you need for trimming and landscaping of garden hedges.Robust steel blades are non-stick coated preventing offcut clippings from sticking to the blades.

- PrecisionCut straight blades.
- Reduced friction resulting in a higher cutting performance.

Lightweight handles made of fibre-reinforced plastic offers a firm and secure grip.

- ErgoTec handle design.
- Excellent cushioning reduces fatigue and limits excessive stress on wrists and arms.

NatureCut 230 mm
12300-20

EasyCut 200 mm
12301-20

PrecisionCut
12302-20

TeleCut 230 mm
12304-20

2-in-1 EnergyCut
12303-20

2.5 x additional cutting force.

Tips and tricks

Do not cut your hedges in very cold conditions, the cold harms the plants. Branches are crushed and you cannot achieve a clean cut that heals well.

Rule of thumb for pruning hedges:
Spring cutting until mid-September, Summer cutting until the end of October.

SHEARS

Grass Shears

GARDENA grass shear allow easy and precise trimming of lawn edges. Certain models feature 360° rotatable blades reach inaccessible areas.

Classic Grass Shears
